BACKGROUND & QUALIFICATIONS

Mike has over 30 years of industry experience and has worked in virtually every sector of the elevator industry. Mike began his career constructing elevators for both new construction and modernization. Eventually Mike was responsible for overseeing all construction crews for the Western United States for two of the largest world-wide elevator contractors.

Mike conducts and oversees modernization inspections for elevators and escalators, conducts project pre-planning, code compliance reviews, constructability reviews, and cost estimating for modernization options. Mike is also very experienced with new construction projects from schematic design to project close-out. Mike can provide start to finish design services and construction oversight for both new construction and modernization as well as maintenance assessments.
